

SuperScribe, LLC Newsletter

RECENT EVENTS

In late November, some of our SuperScribe management team members attended Gwinnett Chamber's Small Business Awards to show support for our President, Katie Grubbs, who was a finalist for the Founder Award! This top-tier recognition paid tribute to an entrepreneur who started small but thought big.

We are extremely proud of Katie and the direction she has taken SuperScribe.

2020 RECAP

What a challenge we have had in 2020! It has been difficult for everyone and SuperScribe is no exception. Another 2020 word that comes to mind is PIVOT.

SuperScribe is in the midst of a pivot into telehealth by offering two new Bluetooth enabled devices that we hope will continue to assist our doctors in their focused care of their patients. We will continue to offer our stellar scribe services to area hospitals and clinics as well.

While times are currently tough, we know that if we keep our goal of assisting our doctors in their everyday care of their patients, we can remain a vital part of the team and continue to contribute all we are able to the healthcare field.

Click on the images below to see more information and videos on how our new devices work!

WHERE ARE THEY NOW?

Bethany Flori, Savannah ENT

Since leaving SuperScribe, Bethany has completed her didactic year and part of her clinical year so far with the Physician Assistant program at South University in Savannah, GA. For clinical year, she is currently on Rotation 6 out of 8 rotations. Bethany will graduate in March of 2021 and hopes to pursue a career as a PA in Family Medicine or ENT. "I feel as if SuperScribe was a great experience for me throughout PA school and I cannot wait to start my career!"

News Article

"Scribes can help a practice add up to 20% more visits, which increases patient satisfaction. That is valuable to patients, who have increased access, and to providers who are able to do what they were trained to do, which is to take care of patients, not paperwork," said Dr. Neda Laiterapong, Associate Professor of Medicine at the University of Chicago Medicine, of her new research. – **Study Examines the Economics of Medical Scribes, October 2020.**
