Company Updates

Our new headquarters is located at:

**5415 Sugarloaf Parkway, Suite 2203
Lawrenceville, GA 30043**

Message from the Vice President

Things are getting exciting around SuperScribe, LLC!

As we are seeing some growth on the horizon, Katie will be focusing on those avenues and I will be stepping outside the office to our established teams, starting with Northeast Georgia Health System.

As I have been with the company for more than 10 years, starting as a scribe, then supervisor and now VP, I am more than happy to reconnect with you all. I will have many new physician and APP faces to meet so bear with me as I learn you all.

My goal is to continue the exceptional service you have received from our company in previous years so here is to making the last quarter of 2021 an excellent jumping off point for 2022! – **Jamie Frady, VP**

“The good physician treats the disease; the great physician treats the patient who has the disease.” - William Osler

WHERE ARE THEY NOW?

Renee Copeland

“After leaving SuperScribe at a hematology-oncology clinic, I was able to use the knowledge I gained as a scribe to do pediatric hematology research at Emory/Georgia Tech. I then started medical school at the Medical College of Georgia, where I’m currently a 3rd year student. I’m still undecided about what I want to do, but have interest in pediatrics and women’s health. I’m really thankful I had the opportunity to scribe, as it really lessened the learning curve for me when it came to medical terminology and writing notes.”

Scribe of the Quarter

Our Super Scribe for the 3rd quarter of 2021 is **Courtney Voyles**! Since day one, Courtney has proven herself to be an exceptional scribe with great work ethic. Her motivation and ability to learn quickly has placed her in a great working relationship with our CHOA ENT providers and management team. Courtney has also gone above and beyond to offer help where needed. We appreciate her flexibility and are proud to have her on our team!

News Article: The Evidence Base for Scribes and the Disruptions of COVID-19

Many physicians work a considerable amount of unpaid overtime. Without a scribe, once a shift has ended, physicians often complete charts and this time isn’t usually captured in administrative databases. Many studies note that physicians go home soon after completion of their shift when working with a scribe but can’t report the magnitude of the effect. One study illustrated decreased documentation time both during and after shift with scribes, but was limited by size and power.
